Goblin Coin

WHITEPAPER
V2.0

TABLE OF CONTENTS

EXECUTIVE SUMMARY

GOBLIN Coin is the NFT-based game launched on IDO platform on top of Binance Smart Chain.

Goblin Coin will allow game developers to raise money by pre-selling unique in-game assets in NFT format. GOBLIN Coin is a GameFi Labs is a standalone game incubator in the WEB3.0 era.

It provides game developers complete GameFi game design system and technical support to help game developers finish blockchain game development easily.

P2EGA is a Play-to-Earn Guild Alliance Game. We hope to help millions of low-income people earn more profits through "Play-to-Earn" games and bring more users to the platform!

INDUSTRY OVERVIEW

NFT INDUSTRY OVERVIEW

Non-fungible tokens or NFTs are cryptographic assets on a blockchain with unique identification codes and metadata that distinguish them from each other. Unlike cryptocurrencies, they cannot be traded or exchanged at equivalency.

This differs from fungible tokens like cryptocurrencies, which are identical to each other and, therefore, can be used as a medium for commercial transactions.

WHAT YOU NEED TO KNOW

NFTs are unique cryptographic tokens that exist on a blockchain and cannot be replicated.
NFTs can be used to represent real-world items like artwork and real-estate.
"Tokenizing" these real-world tangible assets allows them to be bought, sold, and traded more efficiently while reducing the probability of fraud.
NFTs can also be used to represent individuals' identities, property rights, and more.

An NFT is a certificate of ownership of a digital good that's supposed to be made in a limited quantity. They can be attached to digital pictures or memes, video clips, or even something as abstract as the original source code for the World Wide Web. If something is "fungible" then it is a mutually interchangeable commodity — like a dollar bill.

No matter what form it takes, when you have an NFT for a specific digital item, you own the certified token for it on a digital ledger or blockchain. Simply put, you get a specialized link that proves your connection to that digital asset. Just like someone can own a highly valuable car in the real world, NFTs offer an opportunity to claim a small slice of the digital landscape.

It's like owning the deed to something that exists purely on the internet.

P2E GAMING INDUSTRY OVERVIEW

Virtual economies in game universes surely are not a novel concept, so what's new about P2E?

Play-to-earn model comes as a new concept that allows the developers and the players to earn from the game. The game developers get to benefit from having players and get to upgrade the game model while the gamers get to own their digital assets in personal wallets and sell them in 2nd marketplace for real world money.

So popular games like World of Warcraft amassed players in millions and although they claim to be Free-to-play, they have players spending certain amounts of real money on their games at different levels. Leave alone the time and effort it takes to rise through the levels of the game.

Now whatever the players collect within the game under their characters or chapters is actually owned by the game's developers and the players can't take their assets outside the game.

I am not saying game developers don't deserve to earn from the game for their effort. The new model of P2E is a new concept that synergize both parties so everyone is compensated for their effort.

We all heard the news of people from third world countries earning decent first world rates playing NFT games.

The reality is that you still have to buy a starter package. In Axie Infinity it costs you somewhere between $100 to $500 to get started with the cheapest Axies which enables you to P2E somewhere between $8-$40. You will make your money back anywhere between 50-80 days playing.

Some NFT games are free-to-play; like Gods Unchained & Splinterlands, but most require starter pack purchase or a progress package.

Axie Infinity is considering setting up Axie Scholarship which engages scholar-players to loan 3 Axies to start playing for a profit of 50-70%.

Gaming-related NFTs generated $4.8 billion of revenue in 2021, in January 2022 alone, blockchain games and their infrastructure raised close to $1 billion adding to the $4 billion raised in 2021, according to DappRadar

WHO ARE THE GOBLINS?

The Goblins are smart, amusing creatures who serve as trustworthy guardians, capable of keeping and growing assets. They, like you and me, are attracted to money and luxury. Who isn't, right?

They were once thought to be mischievous humanoid creatures with high intelligence, a penchant for tricks, and demonic characteristics, according to European tradition.

Location: Billions of light-years away from the Milky Way galaxy
The Goblin galaxy is home to four ancient races.

Races: Sorcerer goblins, Angelic goblins, Demonic goblins and Dwarf goblins.

Social situation: These four ancient races have been fighting a relentless war for the other planet of the galaxy—Sirius, for centuries.

Close to depleting their respective planets, these four goblin races will be nestled by the last surviving race.

The gate: Thanks to the magical portals opened on the east side of these four planets every 20 years, the warriors of the four races pass to the planet Sirius with their kings.

The challenge: The race that can take the Holy Spirit castle will also be the new owner of the planet.

WHO ARE THE GOBLINS?

For this fortress war, the surviving race must defeat the last stronghold's spiritual defender, the sky dragon, and obtain the portal gate that will close the dimension of other planets in the centre of the galaxy. But every time they are defeated by the sky dragon. It is in your hands which tribe will ultimately win in the battle of power and reason. The tribe that formed the strongest alliance will find eternal life and life.

In the Sirius universe, which belongs to the game, will be the scene of endless clan wars and exciting battles.
This game is the scene of the war between different races from all over the universe. Thanks to the virtual avatars, weapons and potions produced, the strongest clan and its members will take their place among the invincibles of the Sirius universe.

In the universe equipped with training arenas and battle zones, the race that has the Holy Spirit realm will be their ruler in the game. The dominant race will be rewarded weekly. You can create avatars in the game or buy unique ones. You can buy weapons and clothes for your character in the game and strengthen it. In this fantasy universe, you can find new friends around the world, form an alliance and embark on new adventures together with them simultaneously.
The Goblins continue to work relentlessly to develop a sensational blockchain-based P2E game as soon as possible. Stay tuned!

A MESSAGE FROM THE GOBLINS

Hello from the Goblin land. We goblin hordes are tired of your world. From your unnecessary intrigues, from your unnecessary jealousy. And we decided to move to the Goblin Planet. We are very happy here. We haven't decided on our roles and names here yet. But we try and we will be what suits us. We don't have egos. Sometimes we are kings, sometimes we are jesters. A magician who sometimes pulls a lily out of a hat. Sometimes angry, sometimes funny. In short, we are whatever adjective makes us happy.

GAME CONCEPT

OBJECTIVE: P2EGA

To develop the Goblin game characters, game teaser & the game itself.

MEET THE MAIN CHARACTERS

Angelic Goblin

ANGEL: This race main element is air. A symbol of goodness and purity. This race, which strives to the end to balance peace and tranquillity among the ancient races, has the power to control the weather. This power of control can give them advantages that will change the fate of the war.

Demonic Goblin

DEMOND: This race main element is fire. It is the most brutal and destructive of the four races. This race, which has terrible arrogance, has destructive features. This race is strong and enduring, it can be more destructive on the battlefield than all the other races.

MEET THE MAIN CHARACTERS

Dwarf Goblin

DWARF: This race main element is the earth. They have been the guardians of gold for centuries. Intelligent and hardworking features distinguishing them from other races. Dwarves who have mastered advanced defensive and martial arts. They can split the soil with the big sledgehammers in their hands.

Sorcerer Goblin

SORCERER: This ancient race with mystical powers has mastered the art of black magic. This race, takes its power by feeding on the fears of the other side, collapses like a nightmare on the weakest on the battlefield.

GOBLIN GAME POSTER

TOKENOMIC

GOBLIN TOKEN

Goblin is a token built on top of the Binance Smart Chain with several impressive features.

The total circulation source of the Goblin, designed with the burning mechanism, will be cut off exponentially. In addition, the combustion mechanism, the innovative Auto Liquidity function, and NFT are combined, resulting in a rapid increase in Goblin liquidity. One of the key features of Goblin is its large-scale implementation of decentralization, which is rare for other tokens.

Combining these three outstanding features, users can get a powerhouse token from anyone but the community.

Black Hole Algorithm

The black hole had 40% of the supply at the time of launch. As a team, 1% of the income to be obtained from NFT revenues will be sent to the black hole by repurchasing circulating tokens every month. This causes the black hole to grow exponentially and the token supply to burn exponentially.

Rugged

Liquidity was locked in PancakeSwap and ownership of the contract was transferred to the burning address.

Fair Launch

40% of the goblin's total supply was burned. 87% of the remaining total supply was added as liquidity. This proves that we are a completely community-driven project.

Safe Automated Farming

5% of all transaction fees are distributed to beneficiaries. As soon as you start holding, you will see a wealth accumulation in your wallet. All wallet owners have a contract that will accumulate extra USDT in their wallets with every purchase and sale.
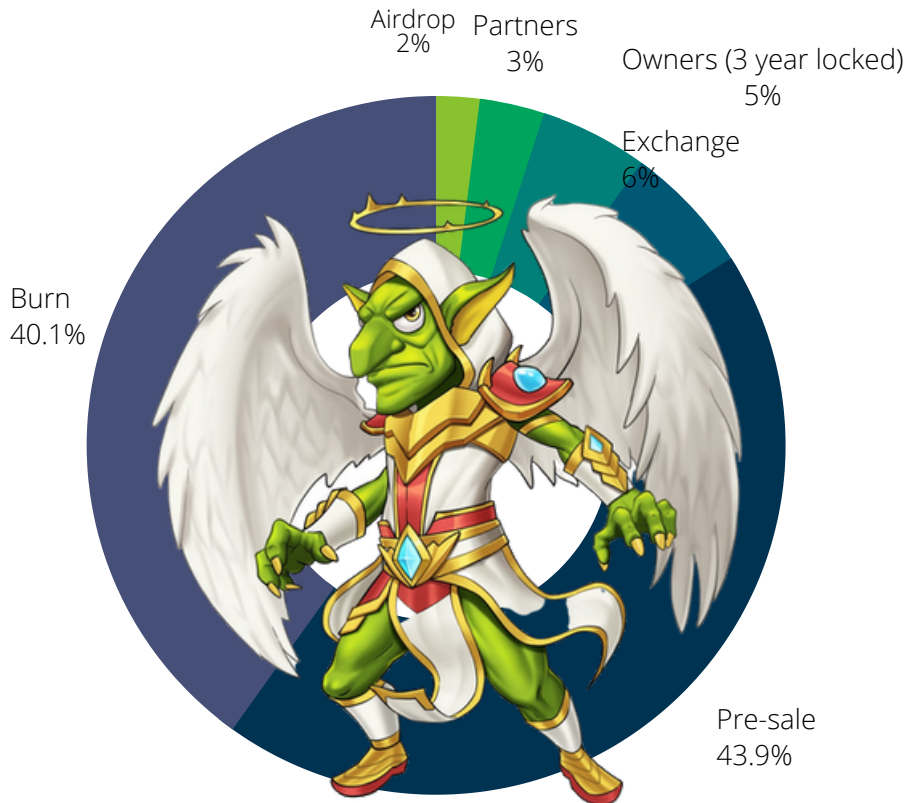

100% Decentralized

The goblin token is community-run and managed by volunteers, as the ownership of the contract is burned and the launch is seeded entirely in liquidity.

Continuously Rising Price Floor

4% of each transaction fee is locked as liquidity in the PancakeSwap GOBLIN/BNB pool, creating an ever-rising price floor.

TOTAL SUPPLY: 100,000,000,000,000 GOBLIN

ROADMAP

COMPLETED MILESTONES

Q4 2021

- Creation of social accounts
- Market research
- Creating a smart contract architecture
- Core team formation
- Creating a marketing strategy
- Creating a 5-year plan and vision
- Website V1

Q1 2022

- Smart contract testing stages
- Whitelist sales
- Special pre-sale
- Public pre-sale
- Activating the community Pre-launch marketing campaigns Public relations
- campaigns (on-going)

Q2 2022

- Coingecko listing
- Coinmarketcap Listing

Q4 2022

- Opening the NFT Market

UPCOMING MILESTONES

Q2 2022

- Game background & characters reveal
- Game 1st teaser release
- Public launch on Pancakeswap v2
- Post-launch ad campaigns
- Certificate inspection
- Apeswap listing

Q3 2022

- First Cex exchange listing
- New partnerships
- Global team building
- Second largest Cex exchange listing
- Digital media advertising campaigns
- TV and Radio interviews
- Digital billboard campaigns

Q4 2022

- Goblin game alpha
- First NFT community meeting
- New business partners
- Joint projects with global mobile games
- Mobile App to go live
- Great Cex listings
- Growth of our global community

COMMUNITY CHANNELS

Our team has demonstrated building a rising audience on community platforms. We are eager to keep growing exponentially and fundamentally revolutionize the game industry.
